

This requirement would be a tremendous hardship to KSCE-TV in terms of the cost of tapes, machines for recording, and the space required to store them. The best tapes today only hold two hours of recording; for us to record every day's programs and then store them for 60-90 days would be simply a horrendous hardship. It would also put a strain on our already strained resources. We're a Christian TV station and don't broadcast obscenity if that's the reason for this. This could possibly become a First Amendment violation depending on who uses the tapes and for what reason.
